The Story of " Boch Ban " - - - - -	6		

EDITORIAL.

A magazine such as this should accomplish two things:

- (1) Preserve a record of important happenings in connection with the Grammar School.
- (2) Supply interesting reading to many old pupils, by giving sketches of school life in the past.

It is not pretended that in this issue either of these things has been accomplished, but it is hoped that this, the first number, may induce many former pupils to refresh their memories and supply material which will enable the editor to perform the second in all subsequent numbers.

We regret that lack of space has compelled us to hold over a number of very excellent articles.

Several gentlemen have expressed a desire to show their sympathy with the objects of this magazine by giving a subscription. In the next issue a list of such subscribers will be published.

We desire very briefly but sincerely to thank contributors and advertisers.
